CRYSTAL WATER GOSSIP

CHAPTER IL

about hard water being a natural product used the word "handy." and about nature intending that we should use it or she would not put it The summer season is no time to judge here. A little investigation on this point of the lil effects of hard water, because may not be out of place on this Sunday the summer heat forces the pores open morying, so beginning here at home we and keeps them active, resulting in the will indulse in a few reflections as to partial elimination of the lime which is whether or not this assertion is to be so destructive to health in cold weather. verified or set down as a dangerous fal- But take it in cold weather, when the

In the first place we find Wichita to You find three quarters of the people sick be situated at the junction of two rivers, with some form of indigestion or stomach each of which furnishes two different trouble; nearly as large a percentage are kines of water, one of them a great deal constipated; nearly haif the people are Displays More Artistic Than harder than the other. Wichita formerly suffering with some form of kidney troudrew its water supply from the Little ble; with many victims of the dreaded river, but now draws it from the big river. Bright's disease. You find theumatism, Which of these waters do you suppose nature intended we should use?

Then again; if you go southwest about for appendicitis. You find men and weten miles, just beyong the Cowskin and men, thin, nervous, sallow, and premaput down a well you will get a soft water; turely aged. You find patent medicine different from both of the waters pros- men spending hundreds of dollars every ent in the rivers here at Wichita. Or month advertising cures for these diif you go east the same distance and put seases. And the cause of nearly all this down a well you will get what the natives plethora of misery is lime and nothing of that district call "gyp" water, "Gyp" but lime water tastes very much like a dose of

The question naturally presents itself, with pepie equally well clothed, fed and which of these wafers is the natural one. housed, where the water supply is soft, and which the artificial? If one of them and will find in that community oneis of just the right composition the other fourth as much suffering from the trouthree must be wrong. Now the question, bies mentioned above as there is in Wich-

is, which is right and which is wrong? Ita, we will agree to take our distilling Then again; taking the Arkansas river muchinery, (which is the finest west of St. with its hard water and the Missouri Louis, and cost us ten times as much as with its soft water. Which of these is all the other distilling machinery in the right and which wrong? In St. Louis state of Kansas put together) and pile the Mississippi carries hard water and it up in the back yard and set it afire the Missouri soft. Which of these is na- and bother you no more. But if these tural and which artificiate

There are millions of people in the with pure water. world, drinking from millions of different wells and streams, with no two of them troubles or want to avoid them and want furnishing water of the same composition. to try a pure water, remember that we In other words millions of people are guarantee Crystal Water to please you orinking from wells and streams where or it costs you nothing. But remember the water is soft, while other millions are this; in using a pure water as a cure you drinking waters of varying degrees of must use at least six or eight large To say that each of these glasses a day. A wine glass every mornwells and streams furnishes natural water | ing would have about as much effect in might possibly be true, but to say that dissolving and cleansing your system of the particular well or stream nearest to the scale which has accumulated for each of these millions of different peo- years as it would in cleansing a family ple furnishes the particular kind of was washing. Don't use is at all unless you ter which is best suited to his needs use it right. Otherwise you may become seems to require definite proof before be- prejudiced against the best thing in the ing accepted as true.

Since nature furnishes her children Santa Fe avenue, corner of Murdock. with all kinds of water to drink it seems to us that possibly she intended we should distributors of Crystal Water 'Phones, use our brains to study the effect of each new 1221, old 918. of these different kinds on the human gystem, and then call our brains into further use to select and provide for ourselves that which has proved itself Normal school building to be built at Edto be the best and safest.

Nature is a rather ruthless mother, are on exhibition at the following places: She does not point out to us what is best, President's office, Normal school building, but compels us to weigh the evidence as Edmond, Oklahoma, Territorial Treasurer, to the fitness or unfitness of things, and C. E. Rambo's office, Guthrie, Oklahoma; to determine for ourselves that which is S. A. Layton & Co., architects, El Reno, good and that which is bad. In the same Oklahoma field where she grows the beneficent corn | The board of education will meet on Octhe deadly nightshade. Side by side with on the Normal school building, and on the the delightful bunch of wild grapes we steam heating plant. Bids of contractors with the grass which delights the palates | board, W. D. Wood, Edmond, Oklahowa. of our domestic animals we find loco weed on or before October 1, 1903. side by side with the mushroom any or all bids. grows the destructive toadstool

To prevent the use of these unhealthy poisonous things nature has given in- gant designs. 23 East Douglas, room II. etinet to animals and animals will not touch them except it be under the direct necessity and to prevent starvation. To man she has given no such instinct. He must use his reason to gulde him away in selecting the beneficial things. And man can only reason from a basis of facts furnished by his observations.

All this leads us back to the water areposition again. Since nature has furnished all kinds of water, varying from per fect purity to extreme hardness it only remains for us to observe the health condifferent kinds are used in order to arrive at something definite in regard to the effects that each has on the health

In beginning an investigation of this character our first impulse naturally is to look to the character f the water of all the great health resorts, where penple no solely because of the curative powers possessed by the waters. are also led to investigate the character in the city using the Keiso Method. of such waters as have proven themselves.
